Troubleshooting steps:

1. **Zoom may not open** if your virus protection software or firewall **blocks** it. In this case you would get the warning message below:

To fix the problem, please **temporarily turn off** your virus protection or firewall.

2. **How to download and install Zoom**

4. **Sound Issue:** If your sound is cutting through perhaps it might be because of the band width (internet speed) issue. In this case, if you turn off your video, as a trade-off, you would be able to hear/talk continually with no interruptions.
5. **Microphone does not work:** please press the up arrow (^) next to the microphone symbol at the bottom of the screen (if not visible exit the full screen mode) and select the right microphone. In majority of the cases it is integrated with your webcam device. In this case select your webcam for sound, otherwise select the Windows sound.
6. **No Video Issue:** please press the up arrow (^) next to the “Start Video” symbol at the bottom of the screen and select the name of your webcam device.
